PRESENTATION AND DISCUSSION						
REVIEW PRIOR ACTION ITEMS						
UP	AM STATUS DATES/ISSUI					
	Admissions (Davis)					
2.	Advancement (Pam Balent)	 Pam reported that the transition of the fund raising function from University Development to the YSU Foundation (YSUF) is complete, with the exception of the monthly push of various updates in the Alumni system to YSUF. The project to develop that process was ceased at the Foundation's request, so currently there is no flow from YSU to YSUF; however YSUF is sending monthly address changes to YSU. The project has been put on hold until YSU is requested to restart, and Computer Center has staffing available. Pam is still receiving requests for donor lists and has been fulfilling them with the caveat that information is through March 31, as the YSUF will need to fulfill those requests in the future. Pam is still responsible for all Alumni requests. Pam, Maureen, and Dennis are reviewing Membership Module processing, reminders, and renewal procedure. They are going to set up billings for life membership payment plans, as they were never billed, missing thousands of dollars. They plan to have the review completed by the end of September, and then begin the set up process of creating reminders. Pam received a request from Carrie Anderson to link Simplicity with Banner to upload Student Activities. A CSR will be completed for this project, with the hopes of working on later this summer. Pam requested to have all reference to Advancement changed to Alumni Engagement in the CSR system. 				
	Distance Education (M Rodriguez)					
4.	Employee Processing Ce (Jennifer Lew					
5.	Faculty (Lore Lease)					
6.	Finance (Mar Lou Castner)	yMary Lou reported Banner Finance for new fiscal year 2015-2016 begins on July 1, 2015. The year-end roll is scheduled for Thursday, July 9, 2015. Banner Finance and eCube will not be available that day. In the event the system becomes available earlier in the day, there will be a				

		communication sent (perhaps by noon) when it becomes available. Student, Payroll, and Account Receivable modules will still be able to continue processing, but the Banner Finance will not be available and cannot run any interfaces at that time. The interfaces that usually run in the evening should still be able to run and will not impact the normal process and schedule. Mary Lou explained that anyone entering purchase requisition entries for the July 1 new fiscal year may enter those for the general fund; however, if you have any other types of funds like restricted gifts or grants; they will have to wait until after the year-end roll to enter requisitions after July 9, 2015.
7.	Financial Aid	Financial Aid completed installation of new release for the year for student loans. Banner was not
	(James Stanger)	ready to have the release in time for Summer semester. Along with 40 schools across the country, including Wright State and Kent State, the beta release was installed and turned out to be an absolute disaster since it had not been tested. The beta release along with 15 patches was installed by Jason Thomas who was able to get the installation done and everything was cleaned up.
8.	General Person	Lori Hinebaugh presented report for Steve - Institutional Research
	(Steve	Jane was asked to make changes to STD Major to remove (in the description) defined as CCC,
	Taraszewski)	LCCC, Lakeland College/ locations that had multiple majors out there with the description that had these majors and wanted to remove the description, but it was going to cause some problems and those who were looking at this description to find out who are in these majors. Supplemental data was added and SDE on STD major so you will be able to see that particular major and if you are earning a degree at Lakeland or at CCC. Jim Hanek will be putting into WebFocus. Eventually there will be a few more changes and Jane will be removing and modifying the description. For example, Allied Health will have 8 selections available. Behind the scenes in SDE, there will be different locations where these can be stored. There is also an online SDE column added and you will know which majors are offered online and which ones are not. It will no longer say online in the description of the major. If there is anyone concerned with these
		changes in majors, you may contact Lori and she will provide the SDE fields. Although these are
		being populated at this point, the description has not yet been removed since there are a few programs that have to be changed first.
9.	Graduate Studies	Angie reported the Graduate School as of last week has purchased the recruiting and admissions
	(Angie Urmson-	software from Ellucian so they are working on bringing them up to speed.
	Jeffries)	
	Human Resources (Alisha Yanniello)	Dennis Konik gave report in the absence of HR/Payroll attendees and reported findings during their measurement period in June for the Affordable Care Act; Alicia and Dennis identified about a dozen part-time staff that may need to be offered health care for next year since they have been working more than 30 hours per week. Those that have rose to the top of their reports will be looked into further as some have four or five different types of positions and then they will be forwarded on to Evelyn. There are only a few more to look and they are forgiven 30% of employees and if they do not offer health care, they are able to go to the Exchange; if there is less than 30% of our employees, we will be good for this year and then it goes down to 5% next year and it may affect about 100 people. It has been rough going the last couple of years and has been very complicated; a combination of a Banner report and YSU written report was used and between the two, there are some differences, and some instances where the report did match up well.
11.	Institutional	No report given.
	Research (Becky Geltz/Steve Taraszewski)	
12.	MyYSU /Luminis	Bob reported that the portal announcement e-mail messages are transitioning over to the YMES e-
	Portal - (Bob Tupaj)	mail system developed by Jim Kleeh. The link to access YMES is located in the e-Services for Faculty and Staff channel on the Home tab. Ken is looking to wind down portal usage for sending e-mail announcements with the transition to YMES. Bob is working with Human Resources to set up a tab of channels in the Test portal and they will be used for internal information and forms for faculty and staff. They are looking to move a number of those items off of their website and into the portal.
1		

 13. Open Source & ERP Programming (IIm Kleeh) Reisk welcomed Jim to his first meeting with the EBOT team and Jim reported that nothing has been finalized as of yet for his area. Programming (IIm Kleeh) Payroll (Lisa Reichert) Iseanne reported that Doug had sent an e-mail about taking the system down in June and wanted to remind us that the last Saturday of SOAR is on June 20, 2015. From the times of 12:30 until 4:00 PM is when the system will be hit at the heaviest time. There should be no Saturdays in July for SOAR. There should be approximately 150 students at that time. Jeanne found a glitch in Clean Address while running monthly clearing house job, she found that students can go in and inactivate their permanent address. This will affect jobs not running for those that contain no active, permanent address. This will affect jobs not running for those that contain no active, permanent address. The only upgrades that are run are for Financial Aid and those federally required. If there are any that are needed, send Jason an e-mail requesting your needs. In July there is a release of one upgrade on gainful employment reporting and mandated by government for Student Accounts in Jeanne's area.

22. Open Discussion	Bob Forchione reported that with International Applications are now live either at Royall or
(Bob Forchione)	Graduate Studies has it in SSB and this is new for us and is a big step to have non-paper
	applications. Bob noticed while testing that the common matching rules are not very strong. The
	last time they were changed was in 2005. He made an edit to the one for regular students and the
	edit Bob made in test it seemed like it was much stronger and wants to have the undergraduate
	people test this in order to scale down duplicate PIDMs. With International applications, there is
	no social security number and the basis for common matching for Student is by the social security
	number. Bob wants to create a brand new common matching rule for international students only.
	He wants to figure out what is important and know what to look at when system automatically
	flags and it does not find much due to not having social security numbers. The first two rules are
	based on socials and would like to run this in test, and if it is successful, he would like to have this
	put into production. Jeanne is highly supportive of going over the matching rules, but her
	submissions to the clearing house in Banner must have a number in the social security field;
	otherwise, the student information is not getting sent. Jeanne would like to be assured that the field
	will be populated with a number. The common match on paper is only on paper. Graduate Studies
	are processing applications to a point and then they are passed over to International Studies. The
	numbers for socials are not working well and when there are duplicate PIDMS and Alumni and
	Student is the area that requires cleanup of duplicates. The undergraduate side is where the
	creation is made, the Provost made the decision that all applications are processed whether or not
	the application fee is paid. Therefore, the applications will go up in numbers and is the easiest
	group to make duplicate PIDMS. Bob asked if Jeanne can open the CSR to request the change
	and so she can approve it.
